### Switch Between Landscape and Portrait Screen

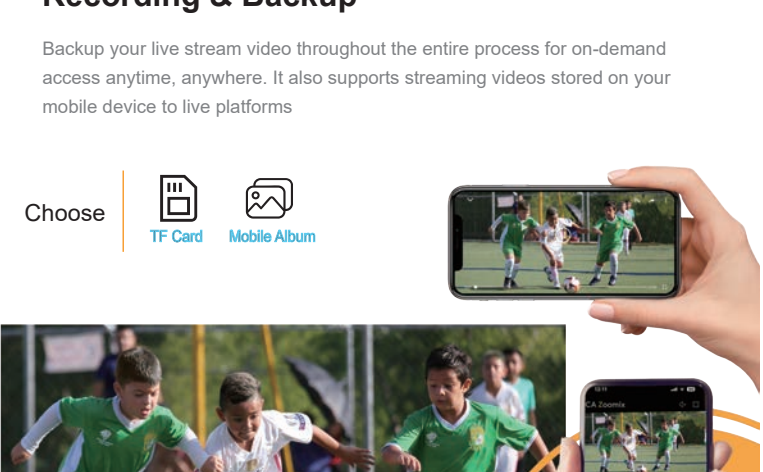

The Zoomix app enables one-click switching between landscape and portrait screens: landscape screen for wide-scene display, and portrait screen for highlighting facial expressions and close-ups.

## Amazing Video Quality

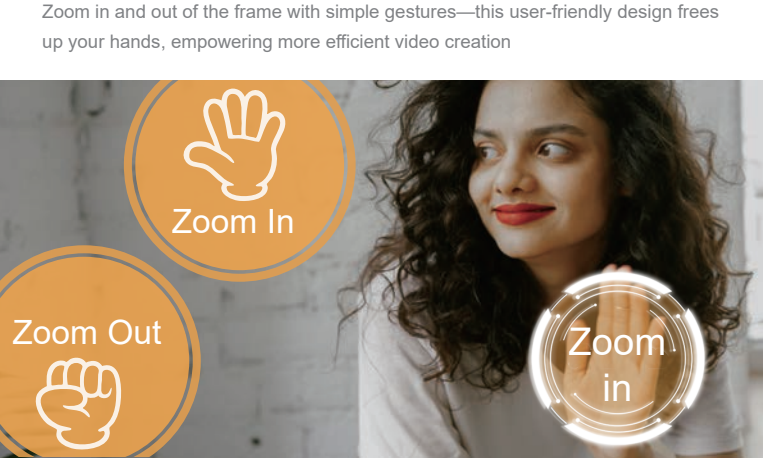

### 4K UHD

Equipped with a 4K UHD lens, it delivers HD video with accurate color reproduction and sharp details—even in low-light environments at night, it still presents premium image quality

### 3x Optical Zoom 9x Hybrid Zoom

Despite its compact size, this device supports 3x lossless optical zoom in 4K resolution and 9x lossless zoom in 720P resolution—delivering delicate, rich details even for long-distance shooting

### TOF

Equipped with a TOF close-range focusing sensor, it enables instant focusing on close-up objects and seamless, fast switching between close-up and long-distance shots

## Professional Live Streaming

### Real-Time Effects

Zoomix lets you add real-time effects like Picture-in-Picture (PiP), scoreboards, and transitions—making your live stream more professional

### Picture-in-Picture

It not only synchronously displays long and close-up shots but also overlays materials from the image library to achieve the Picture-in-Picture (PiP) effect

### Recording & Backup

Backup your live stream video throughout the entire process for on-demand access anytime, anywhere. It also supports streaming videos stored on your mobile device to live platforms

## Powerful AI

### Gesture Control

Zoom in and out of the frame with simple gestures—this user-friendly design frees up your hands, empowering more efficient video creation

### Voice-Controlled Scene Switching

No manual operation required — simply say "Zoomix, give me a close-up shot" to achieve a smooth transition from a long shot to a close-up shot

### Auto Framing

It intelligently adjusts the composition based on the position and number of people, consistently delivering the optimal frame
